## Section 16 - 8/16/2025, 5:29:29 AM

Recommendations

## Section 17 - 8/16/2025, 5:29:29 AM

1. Folder Reorganization

- \*\*Create\*\* `/product-specs` folder for all user stories and requirements

- \*\*Move\*\* 05-backlog items to product-specs (preserve in git history)

- \*\*Archive\*\* completed investigations and reports older than 30 days

## Section 18 - 8/16/2025, 5:29:29 AM

2. File Consolidation

- Combine related documentation into single files where appropriate

- Remove duplicate processor specifications

- Consolidate test twin specifications

## Section 19 - 8/16/2025, 5:29:29 AM

3. Critical Preservations

- All files in 01-core must be preserved

- Current manifests and configurations must be maintained

- Active user stories and architectures must remain accessible

## **Section 20 - 8/16/2025, 5:29:29 AM**

### 4. Azure DevOps Integration Prep

- Product specs can map to Azure DevOps work items
- SDLC process docs can become wiki pages
- Scripts can be integrated into pipelines

## **Section 21 - 8/16/2025, 5:29:29 AM**

### Next Steps

1. Review this audit report
2. Confirm files for archival
3. Create product-specs folder structure
4. Move files according to recommendations
5. Update references in remaining files
6. Commit with clear message about reorganization
